2.4.3.3 Shooting chairs with a height above 45 cm are considered as high shooting chairs. For these chairs a conversion table indicates the maximum height of the chair in relation to the length from the floor to the top of the knee. The conversion table is based on the following calculation:

$$\text{Top of knee} \times 1,12 = \text{max height of seat}$$

2.4.3.4 The measurement is done with shooting equipment, shoes, gear and measured in sitting position.

2.4.3.5 All shooting chairs will be checked with the shooter in the shooting position during the equipment control and will be subject to spot checks on the shooting line before, during or immediately after the competition.

2.4.3.6 No part of the backrest of any shooting chair will be permitted to exceed the maximum height laid down in these rules, including and especially the vertical side posts of the backrest. (see picture)

Handles and side posts may not exceed height of backrest

2.4.3.7 No part of the backrest may be higher than the maximum height allowed by the shooter's classification.

2.4.3.8 The maximum slack (stretch) of the fabric of the backrest, that is the distance from the front of the vertical side posts of the backrest to the deepest part of the backrest, shall not exceed 8 cm. This is to be measured with the shooter in the chair in the shooting position. (see picture)

Slack < 8cm

The length of the spine is measured in vertical position from the surface on which the shooter is sitting, along the contour of the spine to the middle of vertebra C7 (vertebra prominence). The measurement will be done during functional classification without shooting gear.

- 2.4.3.14 For class SH1C & SH2C shooters the length measured from C7 until 10 cm under the armpits (axilla), at the rifle supporting side for rifle shooters and the side of the shooting arm for pistol shooters, needs to be free above the backrest. (see picture)

- 2.4.3.15 The minimum length of back above the backrest will be marked on the ID card. (see picture)
- 2.4.3.16 The minimum length of back above the backrest will be marked on the shooting jacket (as a reference only) in the center of the back and the mark must be visible at all times.
- 2.4.3.17 For SH1A and SH2A shooters, a back-support of any height may be fitted to the shooting chair in

such a way that competitors may take a rest against it between shots. However there must be clearly no contact between shooter and back-support when firing.

- 2.4.3.18 Sitting competitors in class SH1A and SH2A may choose to stand. If so they must stand free of any artificial support with the exception of medically certified normal prosthesis/ orthosis.
- 2.4.3.19 A shooting chair will be supplied by the competitor.
